Attendance, Working Hours & Half-Day Logic

1. Regular Shift – 8:30 AM to 7:00 PM

Standard Check-in: 8:30 AM
Standard Check-out: 7:00 PM
Grace Period: 10 Minutes
Late Mark: 8:41 AM onwards

Employees checking in up to **8:40 AM should NOT be marked as Late.**

If an employee uses grace minutes, the same number of minutes must be added to their required checkout time.

Required Check-out = 7:00 PM + (Actual Check-in − 8:30 AM)

Examples:

- 8:30 AM → 7:00 PM
- 8:33 AM → 7:03 PM
- 8:37 AM → 7:07 PM
- 8:40 AM → 7:10 PM
- 8:41 AM onwards → **Late**

---

2. Second Shift – 10:30 AM to 9:00 PM

Standard Check-in: 10:30 AM
Standard Check-out: 9:00 PM
Grace Period: 10 Minutes
Late Mark: 10:41 AM onwards

Grace minutes must be compensated during checkout.

Examples:

- 10:30 AM → 9:00 PM
- 10:33 AM → 9:03 PM
- 10:37 AM → 9:07 PM
- 10:40 AM → 9:10 PM
- 10:41 AM onwards → **Late**

---

3. Saturday Shift – 9:00 AM to 7:00 PM

Standard Check-in: 9:00 AM
Standard Check-out: 7:00 PM

Grace Period: 10 Minutes
Late Mark: 9:11 AM onwards

Examples:

- 9:00 AM → 7:00 PM
- 9:03 AM → 7:03 PM
- 9:07 AM → 7:07 PM
- 9:10 AM → 7:10 PM
- 9:11 AM onwards → **Late**

---

4. Sunday Shift – 10:00 AM to 2:00 PM

Standard Check-in: 10:00 AM
Standard Check-out: 2:00 PM
Grace Period: 10 Minutes
Late Mark: 10:11 AM onwards

Examples:

- 10:00 AM → 2:00 PM
- 10:03 AM → 2:03 PM
- 10:07 AM → 2:07 PM
- 10:10 AM → 2:10 PM
- 10:11 AM onwards → **Late**

Sunday has NO Lunch Break and NO Regular Break.

Lunch & Break Logic

For normal working days except Sunday:

Lunch Allowance: 1 Hour
Regular Break Allowance: 30 Minutes

The CRM should calculate the employee's actual Lunch and Break duration from their recorded break timings.

Net Working Hours = Actual Check-out − Actual Check-in − Actual Lunch Duration − Actual Break Duration

---

Daily Required Net Working Hours

Regular 8:30 AM – 7:00 PM Shift

Total Presence = 10h 30m
Lunch + Break = 1h 30m
Required Net Working Hours = 9 Hours

10:30 AM – 9:00 PM Shift

Total Presence = 10h 30m
Lunch + Break = 1h 30m
Required Net Working Hours = 9 Hours

Saturday 9:00 AM – 7:00 PM

Total Presence = 10 Hours
Lunch + Break = 1h 30m
Required Net Working Hours = 8 Hours 30 Minutes

Sunday 10:00 AM – 2:00 PM

No Lunch / Break deduction
Required Net Working Hours = 4 Hours

Half-Day Attendance Logic

Half-Day must be calculated based on **Net Working Hours**, NOT simply office presence duration.

Half-Day Minimum = 50% of the Required Net Working Hours for that shift.

Regular Shift – 9 Hours Required

50% of 9 Hours = **4 Hours 30 Minutes**

Employee must complete at least **4h 30m Net Working Hours** to qualify for Half Day.

10:30 AM – 9:00 PM Shift – 9 Hours Required

Half-Day Minimum = **4 Hours 30 Minutes**

Saturday – 8 Hours 30 Minutes Required

Half-Day Minimum = **4 Hours 15 Minutes**

Sunday – 4 Hours Required

Half-Day Minimum = **2 Hours**

Attendance Status Calculation

CRM should automatically calculate the final attendance status based on Net Working Hours.

For a normal 9-hour working day:

- **9h or above Net Work → Full Day**
- **4h 30m to below 9h → Half Day**
- **Below 4h 30m → Does NOT qualify for Half Day**

The same 50% rule should dynamically apply based on the employee's assigned shift.

Half-Day Threshold = Required Net Working Hours × 50%

Example:

If an employee is assigned a 9-hour shift and their calculated Net Working Hours is **4h 35m**, they qualify for **Half Day**.

If their Net Working Hours is **4h 20m**, they do **NOT** qualify for Half Day.

CRM Should Display

For every employee, show:

- Assigned Shift
- Actual Check-in
- On Time / Grace / Late Status
- Grace Minutes Used
- Required Check-out
- Actual Check-out
- Total Presence Duration
- Lunch Duration
- Break Duration
- Net Working Hours
- Required Working Hours
- Half-Day Minimum Hours
- Final Attendance Status – **Full Day / Half Day / Absent**
